Liven Up Your Landscape with Trees

Spring is the best time of the year to plant a tree, and there are so many reasons to add one (or more) to your home's landscape. Trees are natural energy savers, improve air quality, increase property value, and serve as a habitat for animals.

Take advantage of the City's annual tree sale. Order deadline is April 15, 2020. Trees will be available for pick up on Saturday, May 9, 2020 from 9 a.m. to 11 a.m. at 9030 Forestview Lane in Maple Grove.

Select from the following:

SPECIES	INITIAL	SUN/SHADE	FEATURES	MATURE	MATURE
	HEIGHT			HEIGHT	SPREAD
Heritage river birch (clump)	5 – 6 ft.	Full sun	Multi-branched tree prized	40-60 ft.	40-60 ft.
			for its highly textural,		
			colorful, peeling bark.		
			Highly heat tolerant;		
			thrives in settings with high		
			water tables and		
			problematic low wet soils,		
			yet adapts to mild drought		
			when established.		
Dakota pinnacle birch (tree	6 ft.	Full sun to	Smooth white bark, spire-	35 ft.	10 ft.
form)		partial shade	like columnar habit of		
			growth, quite dense, great		
			for screening; insect		
			resistant. Adapts well to		
			dry and moist locations.		
			Leaves turn yellow in fall.		
Hackberry	5 – 6 ft.	Full sun	One of the toughest of	70 ft.	50 ft.
			shade trees while		
			maintaining an attractive		
			and neat habit of growth;		
			interesting warty bark, ages		
			beautifully; tolerant of		
			almost any growing		
			conditions except standing		
			water. Leaves turn buttery

			allowed to dry out. Will benefit from being planted in a relatively sheltered location.		
Spring snow crab	5 – 6 ft.	Full sun	Snowy white flowers in spring; hardy fruitless variety; narrowly upright and columnar growth habit. Leaves turn yellow in fall. Not disease resistant. Prefers average to moist conditions; shouldn't be allowed to dry out.	25 ft.	15 ft.
Summerwine ninebark (tree form)	4 – 5 ft.	Full sun	Season-long purple foliage. Covered with soft pink flowers in late summer. Adaptable and easy to grow, with excellent resistance to powdery mildew.	5-6 ft.	5-6 ft.
Swamp white oak	6 ft.	Full sun	Large, imposing shade tree; upright spreading habit of growth, best in larger landscapes. Extremely tough and adaptable to wet conditions but not tolerant of alkaline soils, rather slow growing. Leaves turn copperybronze in fall.	60 ft.	60 ft.
Techny arborvitae	24 inches	Full sun to partial shade	Broadly-based pyramidal form; dense foliage that maintains its handsome dark green coloring all year. Excellent for medium to tall hedges or screens. Evergreen. Water regularly in extreme heat. Requires less water once established. Slow growth rate.	10-15 ft.	6-10 ft.
Honeycrisp apple	5 – 6 ft.	Full sun	One of University of MN's best apples; apples ripen evenly and hold well on the tree. Needs a pollination	20-25 ft.	10-15 ft.
